

Professional Services

Delivering value through
IT, Configuration, and
Compliance Services

The impressive benefits of a digital pathology system justifies its installation. However, choosing the vendor with the experience and expertise to meet your unique needs is critical to the success of achieving operational efficiencies and streamlined workflow. Aperio is not only the leader in hardware and software innovation for digital pathology, but also is at the forefront in offering a full range of value-added professional services to our customers.

Harness the value of a full-service digital pathology provider by partnering with us to leverage our expertise in implementing an operating environment that maximizes your investment in digital pathology.

Aperio's Professional Services

portfolio comprises three

categories of services, including

IT Services, Configuration

Services, and Compliance

Services. In addition, we provide

enterprise-level training and

support to ensure your success

and complete satisfaction.

We also offer a host of value-

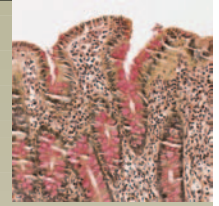

added training services to help

you meet your particular digital

pathology learning objectives.

IT Services

The Aperio IT Services group delivers technical configuration and integration solutions that enable you to realize the full value of your investment in Aperio's digital pathology solutions.

STANDARD SERVER SET UP & CONFIGURATION installs the Spectrum™ digital pathology software suite onto a single server in tandem. Benefit from the superior performance of a dedicated server to host your digital slides and software applications.

ADVANCED SERVER SET UP & CONFIGURATION distributes the Spectrum digital pathology software suite across two or more servers, enabling enterprise-class performance, quality, and scalability resulting in a more efficient, responsive, and integrated server infrastructure.

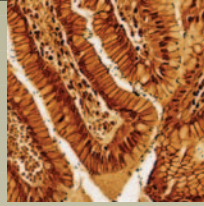

MULTIPLE SITE INTEGRATION establishes a centralized database and web interface from which information can be shared among various remote locations. Benefit from centralized management of data, elimination of redundant data entry, and reduced organization-wide data inconsistencies.

LIS INTEGRATION provides a seamless interface between your institution's laboratory information system and Spectrum Plus information management system. Benefit from the elimination of redundant data entry, workflow automation, and reduced organization-wide data inconsistencies.

Professional

Configuration Services

The Aperio Configuration Services group is a responsive team consisting of highly-trained image analysis experts, applications specialists, project managers, and laboratory workflow experts who provide differentiated services to you and your staff.

SPECTRUM PLUS SET UP & CONFIGURATION

provides personalized workflow evaluation and integration into the Spectrum Plus software application, resulting in maximum benefit from Spectrum Plus features and functionality.

BARCODE DATA PARSING SET UP & CONFIGURATION establishes the automation of data entry, data parsing, and auto-data hierarchy build available with Spectrum Plus with barcode decoding.

GROSSING STATION SET UP & CONFIGURATION creates an interface between a third-party grossing station and the Spectrum Plus information management system, resulting in automated archival of gross images into Spectrum Plus.

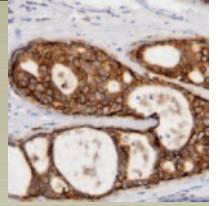

ALGORITHM TUNING entails understanding your particular application for an algorithm and then adjusting the parameters of the algorithm to achieve optimal performance for the application.

SPECTRUM WEB PAGE BRANDING alters the look and feel of the Spectrum graphical user interface according to your specific requirements.

REPORT TEMPLATE MODIFICATION actuates static and dynamic changes to an Aperio standard report template to accommodate the particular needs of a specific application and workflow.

Compliance Services

The Aperio Compliance Services group provides the personalized support and service you require to ensure compliance with appropriate regulations. Our compliance consultants are results-driven and focused on delivering an outcome that will be a regulatory compliant environment that meets your specific requirements.

GLP VALIDATION provides an on-site validation manager to ensure that your system is validated according to current GLPs, including the electronic record and electronic signature requirements of 21 CFR Part 11. Aperio offers a suite of IQ, OQ, and PQ protocols that our validation manager executes at the site location to ensure that the system's installation, configuration, operation, and performance is documented to meet regulatory expectations.
